

PANDUAN “UPLOAD” FILE DALAM GITHUB

Link Github: <https://github.com/dashboard> , Email: Femsmedivest@gmail.com (Medivest2024)

The screenshot shows a GitHub repository page for 'Critical-System-FEMS-Medivest'. In the top right corner, there is a 'Code' tab and a 'Add file' button with a dropdown menu. The dropdown menu contains two options: '+ Create new file' and 'Upload files'. A red box highlights this 'Upload files' option. A yellow box with the number '1' indicates the step to click 'Upload files'.

Untuk menambah atau upload gambar/video/file, cari tab "Add File" dan klik "Upload Files"

The screenshot shows the 'upload/main' page of the GitHub repository. It features a large central area with the text 'Drag additional files here to add them to your repository' and 'Or choose your files'. A red box highlights the 'choose your files' button. A yellow box with the number '1' indicates the step to click 'choose your files'. Below this, a file named 'Panduan mengubah atau penambahan aset.pdf' is listed. A yellow box with the number '2' indicates the step to click on this file. At the bottom, there are 'Commit changes' and 'Cancel' buttons. A yellow box with the number '3' indicates the step to click 'Commit changes'. A yellow box with the text 'Selepas file sudah di-upload, click "commit changes" then file sudah berada dalam fail repo anda.' is shown.

Klik "choose your files" untuk upload file yang kita inginkan

1

2

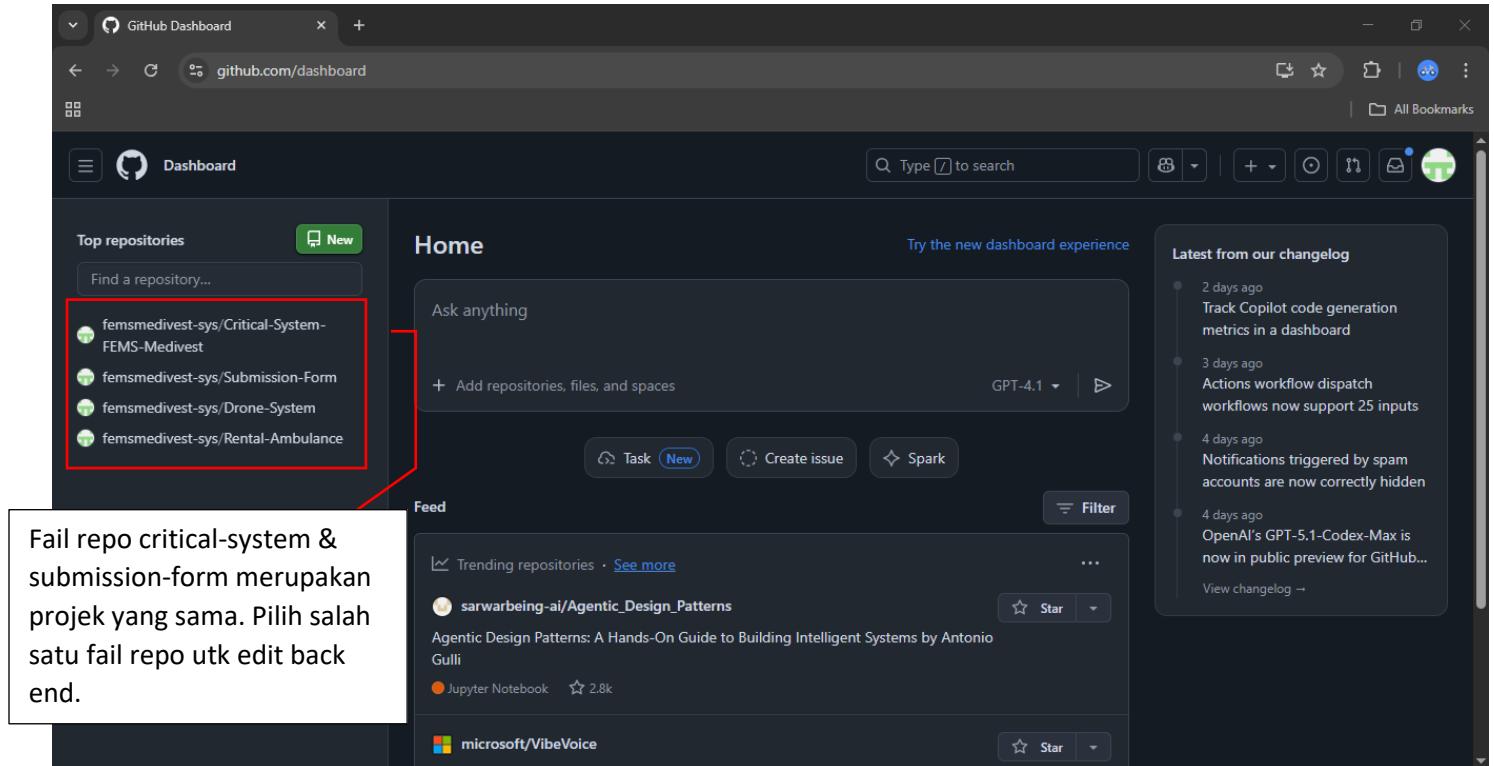

3

Selepas file sudah di-upload, click “**commit changes**” then file sudah berada dalam fail repo anda.

The screenshot shows the main repository page for 'Critical-System-FEMS-Medivest'. The file 'Panduan mengubah atau penambahan aset.pdf' is now listed in the file list, along with other files like 'IT2.webp' and 'about.html'. A red box highlights this newly uploaded file. A yellow box with the number '1' indicates the step to click on the file to view its details.

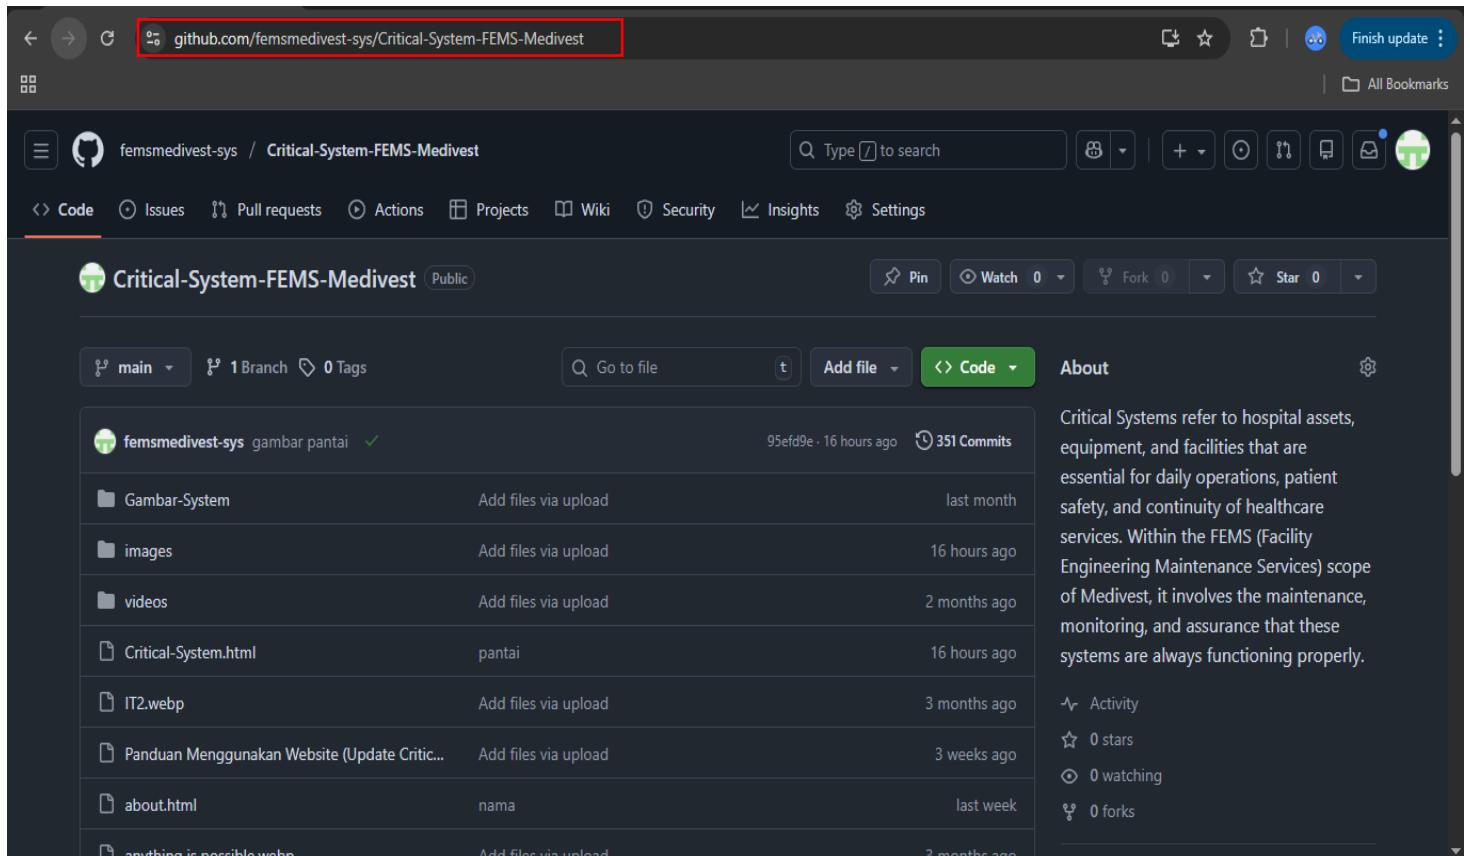

PANDUAN MENAMBAH BUTTON HOSPITAL

Link Github: <https://github.com/dashboard> , Email: Femsmedivest@gmail.com (Medivest2024)

Fail repo critical-system & submission-form merupakan projek yang sama. Pilih salah satu fail repo utk edit back end.

- Pilih fail repo “**femsmedivest-sys/Submision-Form**”, paparan dibawah akan muncul dan terdapat fail yang sudah dibuat sebelum ini. Untuk edit/ubah program yang sudah dibuat dalam environment Github, pengguna perlu ubah link url tersebut dalam kotak merah dibawah kepada <https://github.dev/femsmedivest-sys/Critical-System-FEMS-Medivest> untuk menggunakan environment VS Code.

The repository page shows a list of files and commits. The 'About' section on the right provides a detailed description of critical systems in the context of hospital operations.

About

Critical Systems refer to hospital assets, equipment, and facilities that are essential for daily operations, patient safety, and continuity of healthcare services. Within the FEMS (Facility Engineering Maintenance Services) scope of Medivest, it involves the maintenance, monitoring, and assurance that these systems are always functioning properly.

- Untuk menambah button hospital dalam website, 3 file perlu membuat perubahan iaitu “**Critical-System.html**, **script.js** & **styles.css**. Ketiga-tiga file tersebut perlu membuat perubahan untuk memaparkan button dalam website

1. File (Critical-System.html)

```
<html lang="ms">
<body>
    <main class="container">
        <section class="hospital-list-section">
            <div class="card-grid">
                <a class="card" id="card-PGD-PASIR-GUDANG" href="hospital-page.html?hosp=PGD-PASIR-GUDANG">
                    <div class="card-overlay"></div>
                    <h3>Hospital Pasir Gudang (Coming Soon)</h3>
                    <div class="status-container">
                        <span class="status-box status-FUNCTIONING">FUNCTIONING: --</span>
                        <span class="status-box status-NOT-FUNCTIONING">NOT FUNCTIONING: --</span>
                    </div>
                </a>
                <a class="card" id="card-PAN-Pantai" href="hospital-page.html?hosp=PAN-Pantai">
                    <div class="card-overlay"></div>
                    <h3>Hospital Pantai (Coming Soon)</h3>
                    <div class="status-container">
                        <span class="status-box status-FUNCTIONING">FUNCTIONING: --</span>
                        <span class="status-box status-NOT-FUNCTIONING">NOT FUNCTIONING: --</span>
                    </div>
                </a>
                <!-- Sila tambah hospital disini -->
            </div>
        </section>
    </main>
    <footer class="main-footer">
        <div class="footer-content">
            <div class="footer-section address-info">
                <h2>Contact Us</h2>
                <div class="contact-group">

```

- Dalam file **critical-system.html**, cari line yang arahan “No 2” untuk tambah hospital yang ingin kita tambah. “No 3” adalah contoh hospital Pantai yang ditambah, Cuma copy “[\(keseluruhan coding including <a & \)](#)” then paste sebelum </div>.

2. File (script.js)

```
const hospitalData = [
    { name: "Hospital Segamat", id: "SEG-SEGAMAT", sheetsUrl: "https://script.google.com/macros/s/AKfycbzVLuWcF9I0QgB7UjKBmfEzbDhKhfvB0ve1ndBt9XlOh2u92zjwAZUF_akhxus" },
    { name: "Hospital Temengong Seri Maharaja Tun Ibrahim, Kulai", id: "HTSMTI-KULAI", sheetsUrl: "https://script.google.com/macros/s/AKfycbxZ5Q_vo-MuMvxbKG1cRZVvwMSQonOUVS4BjDU6S5EIX-VlwazRK3vIR9f" },
    { name: "Hospital Kota Tinggi", id: "TKG-KOTA-TINGGI", sheetsUrl: "https://script.google.com/macros/s/AKfycbxr1iVaLleGuy_HhccDPm_6ipUG898uWzrxFFQqSwuSanRH8vRmlL" },
    { name: "Hospital Mersing", id: "MER-MERSING", sheetsUrl: "https://script.google.com/macros/s/AKfycbwkVr2lnVB_Ow1AttIXH4psBmSQ8m_OdaN-z3_JgUmq7mmrtYfog2UVPL1_t7Q" },
    { name: "Hospital Tangkak", id: "TGK-TANGKAK", sheetsUrl: "https://script.google.com/macros/s/AKfycbxNndAZ7u0am61ljzwGJWFbd7VY9j-Ehu3QzgtnTo7bu1tKg80aqSrE7NRh-dn" },
    { name: "Makmal Kesihatan Awam Johor", id: "MKJ-JB", sheetsUrl: "https://script.google.com/macros/s/AKfycby3NnHsa3pDqbh931JWrYJ_GTs2VzIx-WgHKiOCngQHid18zLhv1Zfv6SoeVHCxLN" },
    { name: "Hospital Permai", id: "PER-PERMAI", sheetsUrl: "https://script.google.com/macros/s/AKfycbxUfZwgj1TEHMHj0KKV7U0FCK3_4Z4FYVewrCkkf06c50rF3xg3Seg1fxvliwbu" },
    { name: "Hospital Pasir Gudang", id: "PGD-PASIR-GUDANG", sheetsUrl: "" },
    { name: "Hospital Pantai", id: "PAN-Pantai", sheetsUrl: "" },
    // Tambah hospital di sini dengan ID dan URL mereka
];
const criticalSystems = [
    { name: "Electrical Supply", id: "Electrical Supply" },
    { name: "Generator Set", id: "Generator Set" },
    { name: "Water Supply System", id: "Water Supply System" },
    { name: "Autoclave", id: "Autoclave" },
    { name: "Medical Gas Pipeline System", id: "Medical Gas Pipeline System" },
    { name: "Vertical Transportation", id: "Lift" },
    { name: "Air Handling Unit", id: "Air Handling Unit" },
];
```

- Untuk file script.js, ia merupakan arahan dimana, website akan fetch data dari **spreadsheet** yang mengandungi detail yang diisi oleh pengguna melalui **form** dan menggunakan url **APP SCRIPT**. ID hospital perlulah sama untuk ketiga-tiga file yang diubah, sebagai contoh Hospital Pasir Gudang, **PGD-PASIR-GUDANG**.

3. File (styles.css)

```

# styles.css > # card-PANTAI
577 /* ===== PENETAPAN BACKGROUND IMAGE INDIVIDU ===== */
578 (Sila pastikan semua gambar berada di folder "Gambar/" dan namanya betul)
579 ===== */
580 /* === NEGERI SEMBILAN === */
581 #card-TUAHKU-JAAFAR {
582   background-image: url('images/HTJ.webp');
583 }
584 #card-KPL-KUALA-PILAH {
585   background-image: url('images/KPL.webp');
586 }
587 #card-JMP-JEMPOL {
588   background-image: url('images/JMP.webp');
589 }
590 }
591 #card-JLB-JELEBU {
592   background-image: url('images/JLB.webp');
593 }
594 #card-PDX-PORT-DICKSON {
595   background-image: url('images/PDX.webp');
596 }
597 #card-TMP-TAMPIN {
598   background-image: url('images/TMP.webp');
599 }
600
601 /* === MELAKA === */
602 #card-MKA-MLK {
603   background-image: url('images/MKA.webp');
604 }
605 #card-JSN-JASIN {

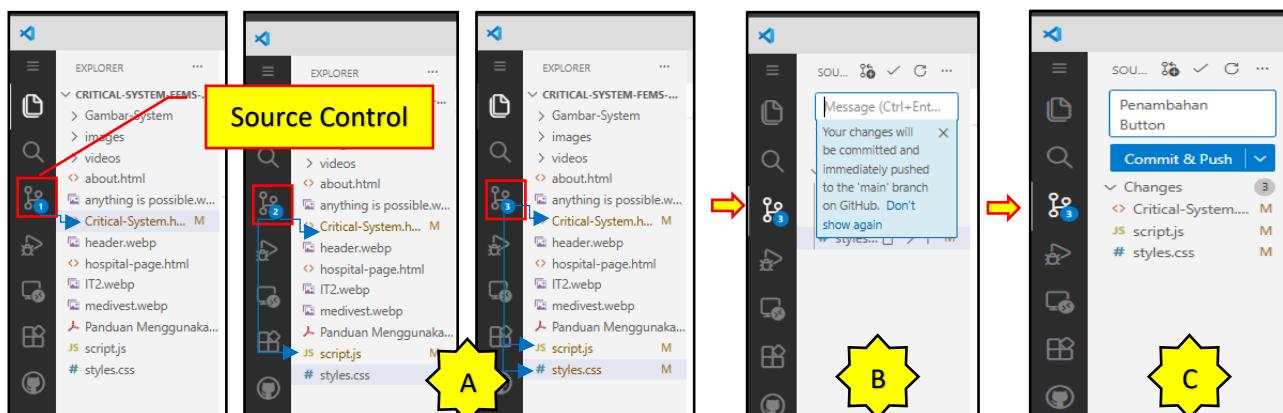

```

- Sila cari “**PENETAPAN BACKGROUND IMAGE INDIVIDU**” dan scroll ke bawah sampai jumpa “**No 3**” seperti gambar di bawah. Cuma copy seperti coding sebelumnya dan tukar ID yang sama untuk dari file sebelum ini. Untuk memasukkan images, pastikan guna format “.webp” agar mudah dan cepat utk process

```

# styles.css > # card-PANTAI
645 #card-IGK-IAHKAK {
646 #card-MKJ-JB {
647   background-image: url('images/MKJ.webp');
648 }
649 #card-PER-PERMAI {
650   background-image: url('images/PER.webp');
651 }
652 #card-PGD-PASIR-GUDANG{
653   background-image: url('images/PGD.webp');
654 }
655 #card-PAN-Pantai{
656   background-image: url('images/Pantai.jpg');
657 }
658
659 /* sila tambah disini untuk overlay wallpaper */
660
661 /* ===== GAYA FOOTER (BAHAGIAN BAWAH) - GABUNGAN DARI RESPONSE SEBELUMNYA ===== */
662 .main-footer {
663   background-color: #040154e3; /* Biru gelap seperti dalam imej */
664 }

```

- Selepas membuat penambahan, klik **source control** yang berada di tab sebelah kiri, akan memaparkan “**3**” bermaksud telah membuat perubahan 3 file “**C**”. Sila masukkan message yang diminta “**B**” sebelum tekan button “Commit & Push”. Perubahan website akan mengambil masa dalam 10-30 second selepas refresh.

Ln 10, Col 95 Spaces:4 UTF-8 CRLF {} HTML Layout: US

- Paparan di atas merupakan environment VS code yang telah kita ubah link dari “[github.com](#) > [github.dev](#)”.
- Untuk tambah detail dalam form, pengguna perlu scroll dan cari line “`const assetLists =`” atau “ctrl+f” then paste akan ada 10 type of critical system.

```

1 <html lang="ms">
2 <script>
3   const scrollFunction() {
4     // ...
5   }
6   const topFunction() {
7     // ...
8   }
9   const GOOGLE_APPS_SCRIPT_URL = 'https://script.google.com/macros/s/AKfycbzwqsGcDaPKNkrdsmhuiP0n5pGYuBB-97dRnuYqg4XBuYbIvq_-2FpqDcgIN'
10  const assetLists = [
11    'GENERATOR_SET': [
12      {name: 'GenSet CTP Bangunan Induk-(1200kVA)', location: 'Bilik Genset'},
13      {name: 'GenSet CTP Chiller-(800kVA)', location: 'Bilik Genset'},
14      {name: 'GenSet CTP(1)-(500kVA)', location: 'Bilik Genset'},
15      {name: 'GenSet CTP(2)-(380kVA)', location: 'Bilik Genset'},
16      ...
17    ],
18    ...
19  ];
20 
```

3

4

Selepas ada penambahan detail & pengguna perlu tekan **source control** (3) sebelah kiri then taip detail dalam tab kosong (lift detail) (4) baru tekan **button commit & push**

2

Untuk penambahan asset cuma edit dalam bahagian ‘.....’ berwarna maroon sahaja.

```

1 <html lang="ms">
2 <script>
3   const assetLists = [
4     'AHU': [
5       {name: 'AHU-23', location: 'Bilik AHU'},
5       {name: 'AHU-24', location: 'Bilik AHU'},
5       {name: 'AHU-25', location: 'Bilik AHU'},
5       {name: 'AHU-26', location: 'Bilik AHU'},
5       {name: 'AHU-27', location: 'Bilik AHU'},
5       {name: 'AHU-28', location: 'Bilik AHU'}
5     ],
6     'LIFT': [
7       {name: '(example)Lift No.1', location: '(example)Main Block'}
7     ],
8     'WATER SUPPLY SYSTEM': [
9       {name: 'TBC', location: 'TBC'}
9     ],
10    'BAS SYSTEM': [
11      {name: 'TBC', location: 'TBC'}
11    ],
12    'CHILLER AND COOLING TOWER': [
13      {name: 'Chiller-1', location: 'Main Block'},
13      {name: 'Chiller-2', location: 'Main Block'},
13      {name: 'Chiller-3', location: 'Main Block'},
13      {name: 'CHMP-1', location: 'Main Block'},
13      {name: 'CHMP-2', location: 'Main Block'}
13    ]
14  ];
15 
```

Ln 289, Col 37 Spaces:4 UTF-8 CRLF {} HTML Layout: US

Pengguna perlu tunggu 1-2 minit untuk tunggu perubahan dalam website yang sudah “*launch*”.

DAMS_V2 (error)

- Ketika develop DAMS-tracker version 2 (<https://github.com/femsmedivest-sys/DAMS-Tracker>) , terdapat error yang melibatkan error **CORS** yang bermaksud API googlesheet akan menghalang mana-mana link masuk ke dalam spreadsheet yang tidak sepatutnya.
- (<https://dash.cloudflare.com/853f4f7ebca2e21f05a79a78973b26b1/workers-and-pages>) Jadi DAMS_ver.2 ini menggunakan cloudflare iaitu satu jambatan menghubungkan ke google spreadsheet tanpa sebarang halangan.
- Pilih application (silent-fog-b55a), sekiranya ada perubahan pada app-script.
- Untuk menggunakan cloudflare, dapatkan API link yang sudah deploy then copy ke dalam “`const GOOGLE_SCRIPT_URL`”
- Make sure “paste” juga dalam script.js.
